EDUCATION

2013 - 2017

STMIK AKAKOM

- Bachelor of Informatics Engineering

SKILLS

- PHP
- Code Igniter
- Laravel
- NodeJS (Express)
- AdonisJS
- NestJS
- Typescript
- Mysql
- Postgresql
- MongoDB
- AWS(EC2, RDS, AURORA, S3)
- Setting Up VPS for API

LANGUAGES

- English (Intermediate)
- Bahasa (Fluent)

PROFILE

As a Backend Engineer with 5 years of experience, I have honed my skills at several renowned companies, including PT Nusantara Training Center Indonesia, PT Netindo Solution Group, etc. My passion for programming is reflected in my strong logical thinking and insatiable curiosity for the latest technological innovations. I am always eager to tackle challenges and fully dedicated to developing efficient and effective solutions.

WORK EXPERIENCE

Backend Engineer

FEB 2018 - MAR 2020

PT Nusantara Training Center Indonesia

- Developing efficient API services
- Designing optimal MySQL database structures
- Proficient in creating APIs with the Laravel framework
- Experience in integrating MySQL with Node.js
- Expertise in using and managing MySQL databases

Backend Engineer

Apr 2020 - Jun 2021

PT Netindo Solution Group

- Developing products through research and development (R&D) activities.
- Designing and implementing API services.
- Building database structures using MySQL and MongoDB.
- Developing API services with the CodeIgniter framework.
- Integrating MySQL into Node.js-based applications.

Backend Engineer

Sep 2021 - Feb 2022

PT Omah Teknologi Indonesia

- Developing efficient and scalable API services.
- Designing optimal MySQL database structures for high performance.
- Building API services using the Laravel framework.

Backend Engineer

Dec 2021- Sep 2023

PT Kreasi Penerus Bangsa

- Product Research and Development
- API Service Development
- Creating PostgreSQL Database Structures on Amazon RDS and Amazon Aurora
- Implementing API Services with AdonisJS

Backend Engineer

Jun 2023- Nov 2024

PT Tamadun Teknologi Indonesia

- Developing efficient and scalable API services.
- Designing optimal and high-performance PostgreSQL database structures.
- Building API services using the modern and effective NestJS framework.

- Gotraining** Feb 2018 - March 2020
 - An e-learning and marketplace platform developed using PHP Laravel and Node.js.
- SiapKompeten** Apr 2020 - Jun 2020
 - An e-learning platform with features such as transactions, Zoom meeting integration, and a module library, developed using Node.js (Express) and MongoDB.
- Otodidak** Jun 2020 - Aug 2020
 - An e-learning platform featuring transactions, Zoom meeting integration, and a module library, developed using Node.js (Express) and MongoDB.
- TK anak cendekia** Aug 2020 - Okt 2020
 - An e-learning platform featuring class transactions and a module library, developed using Node.js (Express) and MongoDB.
- Kolonia** Sep 2020 - Des 2020
 - A forum that includes e-learning and marketplace features, developed using PHP CodeIgniter with MySQL as the database.
- Amila** Jan 2021 - March 2021
 - Amila is part of Project Kolonia, an e-learning platform developed using PHP CodeIgniter and MySQL.
- Bidankita** Aug 2020 - Jun 2021
 - Bidankita is an enterprise system encompassing medical records, e-learning, e-commerce, and POS functionalities. It was developed using PHP CodeIgniter, MySQL, the Midtrans payment gateway, and Firebase notifications.
- ASW Samasy** Sep 2022 - March 2023
 - An e-commerce platform for mobile accessories, developed using AdonisJS and PostgreSQL.
- Heha Ticketing** Nov 2022 - March 2023
 - A ticketing and POS system, developed using AdonisJS and PostgreSQL, integrated with an automatic gate system.
- Radius Digital Mart** Jan 2022 - Jun 2022
 - A Quick Mart e-commerce platform with features for suggesting nearby locations and tracking deliveries, developed using AdonisJS, PostgreSQL, Firebase notifications, and Google Distance Matrix. The application is deployed on AWS EC2 and utilizes clustering for improved performance.
- LOCAFE** Jan 2022 - March 2022
 - A platform for suggesting nearby cafes along with their specifications, using proximity calculations based on latitude and longitude. The system is developed using AdonisJS and PostgreSQL, deployed on AWS EC2, and later migrated to Google Cloud Platform (GCP).
- Android TV** Mei 2023 - Jun 2023
 - An Android TV application designed for patients in hospitals, featuring services such as TV channels, food ordering, and the ability to contact hospital staff. It is developed using AdonisJS and PostgreSQL.
- ERP Barakah** Jun 2023 - Sept 2024
 - An enterprise system for Barakah Hospital, which includes HRD management, warehouse management, technician management, and accounting management systems. It is developed using NestJS and PostgreSQL, and deployed using Docker.
